

The PHT Difference

At PHT Systems, we believe in the value of relationships. In fact, many of our customer partnerships have lasted more than four decades due to the clients' trust in our equipment, training, and support. From our first introduction to well past your purchase, you will experience the PHT difference:

1. Discovery

Bringing more than 40 years of industry experience to the table, we will sit down with you to learn about your business, assess your goals and needs, and evaluate your site for revenue generating and cost savings opportunities.

2. Recommendation

We make recommendations for equipment from leading manufacturers that will fit your needs and will also perform a demo to showcase our proposed solutions. (We extensively vet our equipment before we agree to sell it, so you can be confident it's the best!)

3. Sale

You select the equipment you are interested in, and we help you complete your purchase. We can also help with installation as well as disposal of any old equipment. However, our partnership doesn't end here – it is just getting started!

4. Training

We offer free training – day or night – for the life of all equipment we sell so that your team is set up for success, including re-training to help with staff turnover. Plus, we will advise on supplies to maintain your equipment and increase your bottom line.

5. Service

Factory authorized technicians with expert knowledge of your equipment are on-call 24/7/365 to solve any equipment issues you experience. We also keep an extensive inventory of replacement parts on hand to minimize your downtime.

6. Added Value

Now that we know you better, we can discuss elevating your flavor profile or adding additional offerings to your menu with a custom breading and seasoning program that's uniquely yours and will keep customers coming back!

With decades of experience and expertise, we bring the most functional pieces of equipment to you – and make sure you are using them efficiently to improve your operations and bottom line. Take the first step and [contact us today](#) to learn more about what makes PHT Systems the ideal partner for your business.
